Case Identified

Someone who: tested positive; potentially was exposed; or reported COVID-like symptoms. CSU students, faculty and staff should use the daily symptom checker: https://covidrecovery.colostate.edu/daily-symptom-checker/

Case Investigation

Case investigator gathers information about suspected or confirmed infection and works with person to recall everyone with whom they had close contact while potentially infectious.

Contact Tracing

Contact tracers reach out to those who may have been in contact with the ill person or positive individual and gather info about the nature of the contact and potential exposure.

Contact Support

All contacts receive education, info, and support. If they meet close contact criteria, they also receive info about physical distancing, self-monitoring, and their potential to spread the virus to others even if they are asymptomatic.

COVID-19 Recovery
